

ATHANASIOS SALAGIANNIS

Computer Science Student · Aspiring Software Developer

Athens, Greece | thanossala7@gmail.com | github.com/thanossala | linkedin.com/in/athanasios-salagiannis | thanossala.github.io

PROFILE

2nd-year Computer Science student at Metropolitan College Athens, focused on full-stack web development (React, TypeScript, Node.js, PostgreSQL). Brings a background of 9 months as a Cadet Officer in the Merchant Navy — real-world discipline, pressure management and teamwork in high-stakes, multinational environments. Seeking an internship or junior developer role to apply and grow technical skills in a professional setting.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS, Chart.js

Backend: Node.js, Express, REST APIs, JWT Authentication

Database: PostgreSQL, Supabase, SQLite

Languages: Java, JavaScript, TypeScript

Tools: Git, GitHub, Vercel, Render, Vite

EXPERIENCE

Cadet Officer — Merchant Navy — International Waters

9 months

- Assisted bridge officers with daily navigation operations across international routes.
- Collaborated with a multinational crew, communicating entirely in English (C2 level).
- Maintained strict safety and operational protocols under high-pressure, time-critical conditions.
- Developed strong responsibility, discipline and teamwork skills in demanding environments — directly applicable to deadline-driven software development.

EDUCATION

BSc Computer Science (in progress, 2nd year) — Metropolitan College, Athens

2025 — Present

- Focus on software development and web technologies.
- Building personal full-stack projects to apply classroom knowledge in practice.

SELECTED PROJECTS

VesselOps — Maritime Crew Management Platform [↗ link](#)

React · TypeScript · Node.js · Express · PostgreSQL · Supabase · JWT Auth

Full-stack platform inspired by real experience at sea. Digitizes crew scheduling, STCW certificate tracking with auto-expiry alerts, watch schedules and a digital logbook for commercial vessels.

ShipLog — Crew Activity Tracker [↗ link](#)

Node.js · Express · SQLite · JWT Auth · REST API · Chart.js

Full-stack app for logging crew activities at sea, with JWT authentication, a full CRUD REST API, and a live-statistics dashboard with Chart.js visualizations. Deployed on Render.

Expense Tracker (React) [↗ link](#)

React · Vite · Chart.js · JavaScript

Personal finance tracker with dynamic expense management, category filtering, interactive charts and persistent storage. Fully responsive.

Weather App [↗ link](#)

HTML · CSS · JavaScript · REST API · async/await

Real-time weather app powered by the OpenWeatherMap API — current conditions, feels-like temperature, humidity, wind speed and 5-day forecast.

LANGUAGES

Greek: Native

English: C2 (Proficient) — developed through international, multinational work environment
